

PROM (patient reported outcome measure) is periodically recorded (e.g. every 2-weeks) and compressed into a single composite score. The PROM is part of ICHOM standard set, specific to Disease/Therapy (e.g. CAD, coronary stent); Using patient cohorts (age, gender, BMI, co-morbidities), expected outcome ranges can be determined.

Fee varies with patient outcome  
Physician incentivized to provide service and achieve good outcomes

Manufacturer reimburses patient during warrantee period  
Manufacturer also helps patient with extended out-of-pocket expenses in poor outcomes
